NRO REVIEW COMPLETED

MEMORANDUM FOR: Deputy Director for Science and Technology

SUBJECT : Candidate Approach to "Lessons Learned"

Listing of S&T Technology Efforts

- 1. This memorandum is for your information only.
- 2. During an early July staff meeting, you requested thoughts on a simple method of documenting future technology efforts in terms of positive or negative results in order to provide an indicator of lessons learned.
- 3. At my request, looked into this and came up with a plausible rirst cut approach. I am attaching a copy for your information and consideration by your staff.

S&T TECHNOLOGY EFFORTS

REQUIREMENT:

To identify quickly (at a glance) S&T technical efforts which are undertaken and to indicate generally whether their results are positive or negative in terms of feasibility, promise, or potential.

PURPOSE

To provide a basis of lessons learned from S&T technological efforts in order not to replough old ground; and by elimination to identify new unploughed ground.

APPROACH & CONSIDERATIONS:

- 1. Provide enough information to answer requirement above.
- 2. Confine data to one listing with each effort described by a single line item entry.
- 3. Keep each entry brief to facilitate fast reading.
- 4. Update listing periodically perhaps quarterly.
- 5. Consider IBM or other appropriate automated format if volume requires similar to attached sample.
- 6. Format may be segregated according to category of effort such as aerodynamic, propulsion, sensors, navigation, communications,

25X1D

- 7. Format probably should not be used as a periodic progress or status report because "results" in order to be brief yet meaningful should be based upon final input upon effort completion.
- 8. Format probably should be established and maintained by S&T staff.
- 9. Data input for S&T listing/format could be prepared by appropriate office upon completion of an effort and forwarded as a supplement to next quarterly progress report.
